**ABLOY® launches new modularized cabinet lock range**

IRVING, TX, April 23, 2008 – Abloy Security, Inc. announces the launch of the new **ABLOY®** cabinet lock range – high security locking solutions with simplicity in assembling and modern design.

**ABLOY®** cabinet locks feature a modern design with modularization and standardization of parts. These locks are suitable for a wide range of applications including display cases, office furniture, lockers, cabinets, storage chests, wardrobes, sliding doors and many others. The **ABLOY®** cylinder construction, patented cylinders, strict key control and extensive master-keying capabilities make **ABLOY®** cabinet locks ideally suited for the most demanding applications. Additionally, these cabinet locks are adjustable from key removable in locked position only to key removable in both locked and unlocked positions. They can also be surface mounted or mortised.

Patented key control with the **ABLOY®** EXEC key series restricts key duplication to authorized personnel. Coupled with the **ABLOY®** systems' extensive master-keying possibilities, this provides for a secure and operationally convenient system.

The unique materials and surface treatments used by **ABLOY®** guarantee a superior level of corrosion resistance of both the visible parts of each lock as well as the internal parts. **ABLOY®** locks are recommended as the best products for all types of weather ranging from freezing to coastal environments since all component parts are highly resistant to wear, dirt, moisture, corrosion and freezing. The virtually pickproof spring free construction prevents the locks from theft as well as jamming and ensures smooth operation.

For more information on these locking solutions please visit our website at [www.abloyusa.com](http://www.abloyusa.com).
