FOR RELEASE ON APRIL 3, 2008

Abloy Security, Inc. to Showcase ABLOY® High Security Industrial Locking Solutions at EEI Spring TD&M Conference

IRVING, TX, April 3, 2008 - Abloy Security, Inc. will be exhibiting **ABLOY®** High Security Industrial Locking Solutions for the Electric Utilities Industries at the upcoming Edison Electric Institute (EEI) Spring Transmission, Distribution and Metering (TD&M) Conference. The EEI TD&M Conference is taking place April 6-7, 2008 at the Hyatt Regency Savannah in Savannah, Georgia.

Abloy Security offers a complete range of maximum security locking solutions to fit the varied security requirements across many industries including: padlocks, puck locks, door locks, flexible keyring locks, hasps and more. **ABLOY®** locking systems provide convenience, durability, security and customer satisfaction in a variety of applications to fit varied security needs.

The unique materials and surface treatments used by **ABLOY®** guarantee a superior level of corrosion resistance of both the visible parts of each lock as well as the internal parts. **ABLOY®** locks are recommended as the best products for all types of weather ranging from freezing to coastal since all component parts are highly resistant to wear, dirt, moisture, corrosion and freezing. The spring free construction prevents the locks from jamming and ensures smooth operation.

ABLOY® offers advanced High Security cylinder designs that are unique in construction, utilizing rotating detainer discs which provide an extensive number of key combinations for large systems, including master keying capabilities. Taking High Security a step further, the **ABLOY®** SMARTDISC systems revolutionizes industrial locking by combining proven mechanical locking solutions with low-power electronics. This new technology provides increased security, flexibility and control.

Abloy Security, Inc. continues as a GSA contractor under Schedule 084. In addition, Abloy Security is a qualified supplier of Federal Specification Padlocks to FF-P-2827, as well as a supplier to the Department of Energy. The Federal Specification **ABLOY®** Padlocks, models PL655 and PL656, feature the **ABLOY®** rotating disc cylinder renowned for its high pick-resistance. This exclusive government profile keyway provides high security for special security projects. These padlocks also feature a quick-change cylinder allowing for instant response to lost or stolen keys. **ABLOY®** PL Series Padlocks are backed by a lifetime functional warranty.
